

USERS' GUIDE

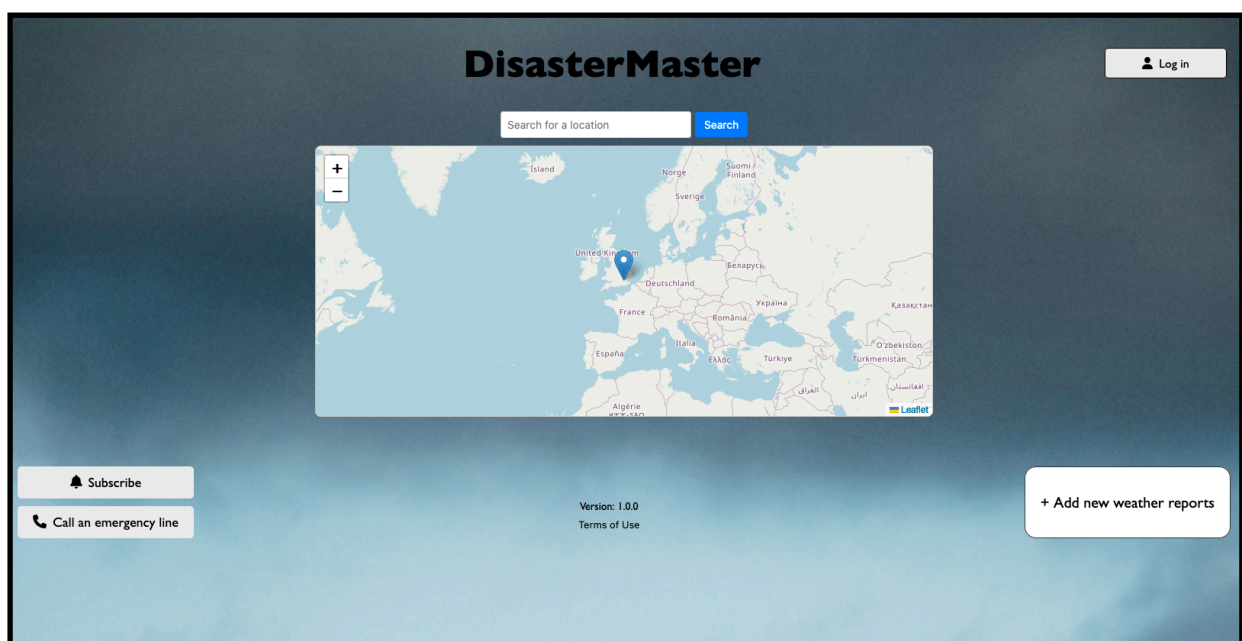

Welcome to the DisasterMaster Users' Guide. In this document you will find everything you need to know about using our app.

1. FRONT PAGE

As you first enter the app the front page will appear. It has an interactive map, search bar, subscribe, call an emergency, add weather reports and login buttons.

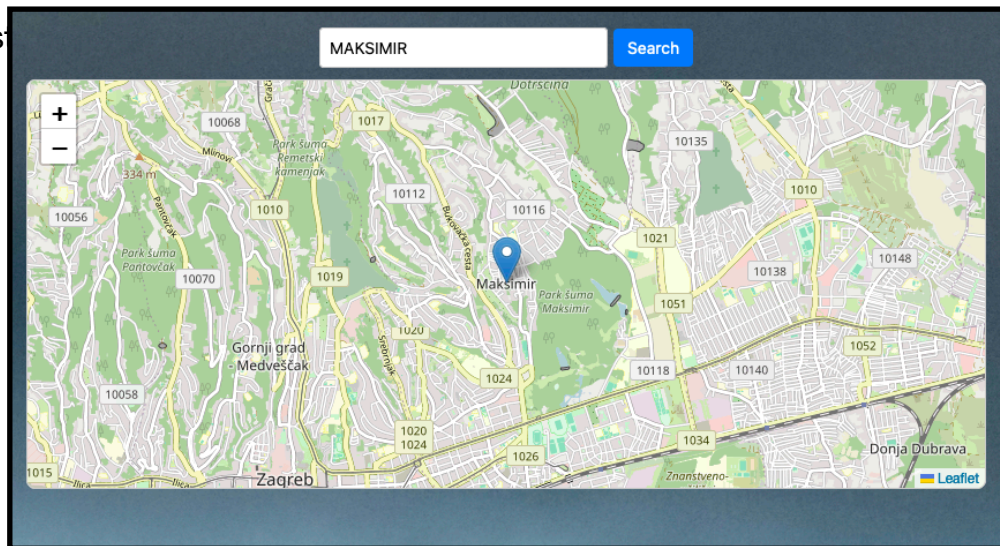

How to use all of the above will be explained in the end of this document.

Front page

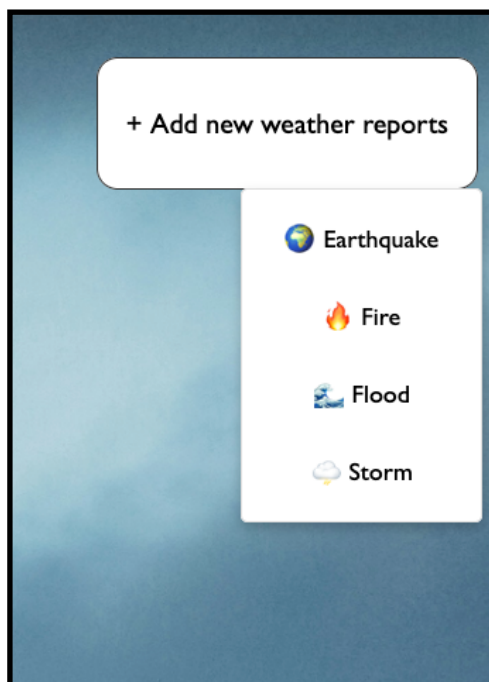

2. INTERACTIVE MAP

You can zoom in and zoom out by on your mouse pad, or you can use the search bar to find a location easier. You just have to click on the search bar, type in the location (it can be an address, town, country) and click on the blue Search button. The map will automatically show you the location you searched for.

3. ADD NEW WEATHER REPORTS

Type of disaster

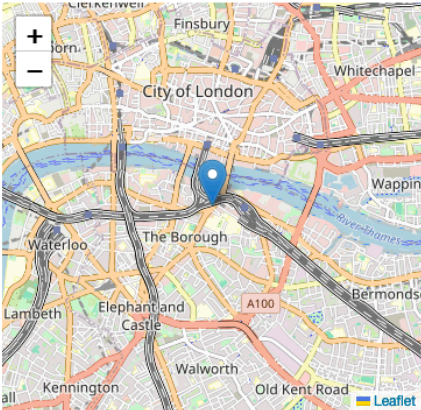

For reporting new disasters you can use the shown on the right lower part of the front page. By clicking on it, you will first get a list of types of disasters you wish to report.

After you click on the type you choose, a report form will appear. Here you have another interactive map that works the same way as the one on the front page. You click on the Enter location tab, write the location and click search. You can also write a short description of the disaster in the description window. And finally you can import a photo of the disaster if you have one.

Just click on the browse button and go through your files until you find the photo to import. After that just click open and the photo will be imported.
